DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, claims 1-12 in the reply filed on 4/21/2009 is acknowledged.

Applicant's election without traverse of 2,2-diphenyl-1-picrylhydrazyl in the reply filed on 4/21/2009 is acknowledged, thus the elected invention is claims 1-4 and 9-12.

Claims 5-8 and 13-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and/or species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/21/2009.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by McGary, Jr. (USP 3,095,394).

Regarding claims 1-4

Art Unit: 1793

McGary, Jr. teaches the use of 2,2-diphenyl-1-picrylhydrazyl and 2,2-diphenyl-1-picrylhydrazine (column 1, lines 1-15).

McGary, Jr. does not teach this compound as an oxidation catalyst, however, the claim is directed towards a composition, and its intended use does not serve to add to the patentability of a composition claim.

Regarding claims 9-12

McGary, Jr. teaches the use of metal ions of copper, iron and silver (column 2, line 35 to column 3, line 73).

McGary, Jr. does not teach the use of these metals as oxidation promoters, however the metals of the reference read directly on those of the instant invention, and as stated above, the claim is directed towards a composition, and its intended use does not serve to add to the patentability of a composition claim.
